

Recommended Data for **Code Compliance Review**

Please email the information below to: service@weberanalytics.com

Job/Project Information: Name, **Project Address** & Specifier + Information Below

- List of Current and Relevant Codes specified by your **Authority Having Jurisdiction (AHJ)**
Note: There may be over-lapping jurisdictions for your project.
- Relevant Building, Room or Site Drawings in .dwg Format
 - Floor Plan, Reflected Ceiling Plan, Sections/Elevations
 - Property/Lot Lines (Exterior Reviews Only)
 - Lighting Schedule and Specification if Available
 - Optional: Furniture/Equipment Plans
- Reflective Values of Finishes
(or clear description of material/paint color)
 - Ceiling (default = 80%)
 - Walls (default = 50%)
 - Floor (default = 20%)
- Luminaire Performance Files in .ies Format
File should match model number specified.

Depending on your organization, it may be to your advantage to have Weber Analytics do more of the background work for you. Among other details, this may include research into which codes apply to the project and which .ies files apply to your specified luminaires.

The more information you provide, the less time it will take for us to compile our report. This page outlines the information required to assess code compliance in most instances.
